## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. Claims 1-15 rejected under 35 U.S.C. 103(a) as being unpatentable over Williams (6132311) in view of Hachquet (6050568).

Williams teaches dealing five partial hands each having two common cards (32,36), dealing and completing each of five hands to five card poker hands (abstract), determining each hand for poker ranks and paying according to pay schedules. Williams teaches all limitations except that it does not deal four face up cards in each hand.

It is well known in the art of casino games that casinos want to make money as fast as possible. Dealing four face up cards will allow players to wait for only one additional card instead of two or three cards which would slow down the game.

In order to maintain a fast pace, it would have been obvious to spend least time dealing additional cards. One of ordinary skill in art at the time the invention was made would have dealt four face up cards for completing the game quickly.

Williams teaches all limitations except that it does not teach dealing each hand from its own deck of cards.

Hachquet teaches dealing each hand from its own deck of cards (abstract). It will be easily understood that dealing identical cards in multiple hands is not possible without using separate decks for dealing separate hands.

One of ordinary skill in art at the time the invention was made would have used separate decks of cards for separate hands.

Art Unit: 3711

Note that pay schedules as in claims 4,5,9,10,14,15 are determined by gaming houses according to their financial requirements.

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. 6474645, 6007066, 5823873, 6098985, 6419578..
